

Execution Times (lin-log) for different Parallelisation Strategies and increasing Parallelism

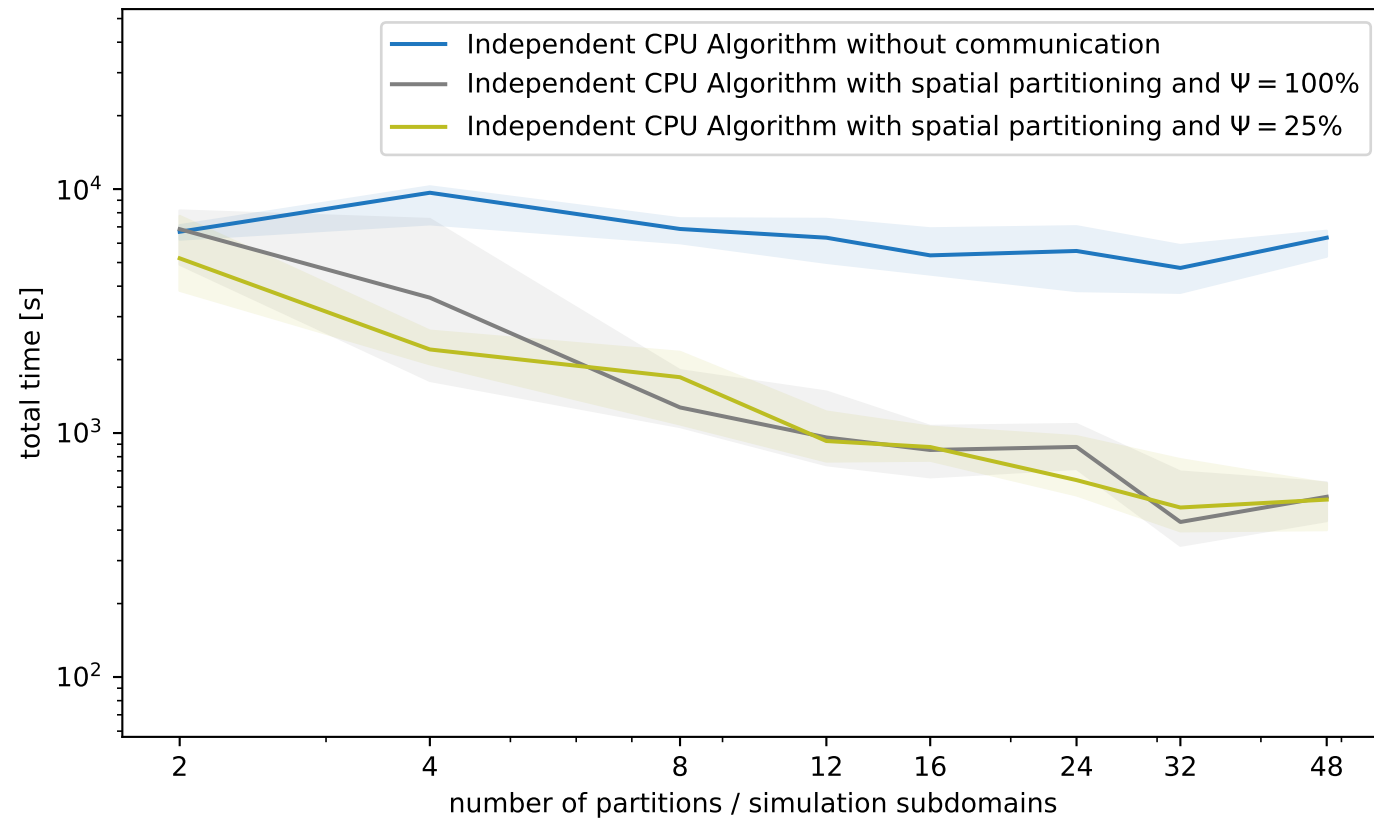

Overview of the Execution Times (lin-log) of all Parallelisation Strategy Families for increasing degrees of parallelism

Execution Times (lin-log) of the approximate Averaging strategy using MPI for increasing degrees of parallelism

Execution Times (lin-log) of the Independent Algorithm using MPI for increasing degrees of parallelism

Execution Times (lin-log) of the Independent Algorithm using Isolated Batch Jobs for increasing degrees of parallelism
